BANY ÊBAN

Being glue, make high impact

With 5 years of experience in software development, with a focus on AI/Data and team leadership.

I am a fullstack AI/Data engineer driven by action and ownership. I thrive as a gap-filler, maker, coder, and OSS contributor — and increasingly, as a technical lead who aligns teams around clear goals. What excites me most is diving deep into both technical challenges and product innovation to build systems that scale and last, while empowering those around me to do the same.

Socials: in • ⌂ • ‹/›

skills

- **Leadership:** Cross-functional collaboration, stakeholder management, ownership coaching, product leadership, embedded PM (requirements, alignment, delivery).
- **Technical:** System architecture design, debugging, performance optimization, testing.
- **Mindset:** HRT, Gap-filler, Maker, Product Thinking, Time Management, Continuous Learning.
- **Research:** AI/ML integration, R&D initiatives, technical proposal writing.
- **Process:** Agile/Scrum methodologies, code review, technical documentation.

tech-stack

- **Programming Languages:** Go/Rust/Python/JS/Bash.
- **Databases:** MySQL, ClickHouse, Redis.
- **Message Queues:** Kafka, Google Pub/Sub.
- **Infrastructure&Monitoring:** Docker, Kubernetes, CI/CD, Grafana, Prometheus, pprof, pyroscope.
- **AI/ML:** LLM, RAG, Agent platform.
- **DSA:** leetcode.com/9bany.

experiences

Wabinex

Tech Lead • Jan 2026 - Present • 2 mos

- Leading technical direction and engineering execution for an AI Platform product.

- **AI Platform:** Defining architecture and driving delivery of an AI Platform — integrating LLMs, agent orchestration, and RAG pipelines to power AI-driven product features.

BeGroup

Be Group - one of Vietnam's fastest-growing tech startups, operator of the Be super app (ride-hailing, food delivery, super-app). Serving 9M+ customers nationwide, with 300,000+ drivers and tens of millions of monthly transactions.

Senior Software Engineer - Team Lead • Oct 2023 – Jan 2026 • 2 yrs 5 mos

- Built and maintained large-scale systems: AI Platform, CDP, Notification Platform, Fraud Detection, Event Pipeline. Acted as embedded PM across all products — owning requirements, aligning stakeholders, and driving delivery end-to-end.

- **AI Platform & LLM Integration:** Led end-to-end design and delivery of an AI Platform powering multiple AI agent products. Defined technical direction, integrated LLMs (OpenAI API), RAG pipelines, and agent orchestration. Worked directly with PMs and business stakeholders to translate use-cases into shipped products — with a lean team.

- **CDP & Notification Platform:** Architected scalable user engagement system delivering >150M messages/day with personalized fare config per user. Collaborated with product and data teams to align on targeting logic and rollout strategy.

- **Fraud Detection System:** Designed real-time fraud detection processing >30M rule-based users, catching >10K fraudulent transactions/day. Worked cross-functionally with operations, risk, and product to define rules and acceptance criteria.

- Diagnosed memory & goroutine leaks in Be-kit using pprof, reducing system cost and improving stability. Conducted internal tech talk to share findings and upskill the team.
- Authored cross-team architectural proposal: Monolith to Microservices — identified systemic risks, defined migration path, and gained alignment from engineering leads and product stakeholders.
- Bridged system gaps and drove cross-functional technical initiatives end-to-end as a technical PM-embedded engineer.

Achievements

- Received BeStar Award 2024 for outstanding engineering contribution.

Primedata.ai VN

Backend Engineer • Full-time • Aug 2022 - Aug 2023 • 1 year 1 month

Aug 2022 - Aug 2023 • 1 year

- Domain: Customer Data Platform (CDP).
- Built and maintained the CDP SaaS product.
- Took ownership of cross-functional glue work to ensure successful delivery.

OLLI Technologies

iOS Engineer • Full-time • Feb 2021 - Aug 2022 • 1 yr 9 mos

- Domain: IOT.
- Owned the Home Assistant iOS application.
- Reduced iOS build time by 80% through build system optimization and pipeline improvements.

projects

- **BeGroup:** CDP, Notification Platform, Fraud Detection System, AI Products, Event Pipeline.
- **Primedata.ai:** CDP SaaS.
- **OLLI:** Home Assistant iOS App.
- **OSS:** curl-to-json, sabledb, db_engine
